

Company Standard Operating Procedure About Jupe

Jupe is short for Jewelry Unique Purchasing Engine & Jupes is short for Jewelry Unique Purchasing Engine Satellite.

Jupe & Jupes, are internet aka identities. The official legal name is Jewelry Network Jupe LLC, & the companies EIN number is 85-0675600. Jewelry Network Jupe LLC is currently being developed. Jewelry Network Jupe LLC hired Bright Bridge Web Development to create, and develop an innovative algorithm, website, website design, software, and network.

Jewelry Network Jupe LLC here after may refer to it's legal name as Jupe or Jupes.

Jupes official idea date is logged February 28, 2019. This is when Jupes started it's journey. Jupes primary function and main objective is to help the average consumer. Jupes is specifically engineered to provide the consumer with product knowledge and information, thus creating an innovative approach in saving the consumer time and money. Jupes algorithm is engineered using Jewelry Unique Purchasing Engine, and it's purpose is to search through the entire internet using key product identifying agent's. The keyword being search. Jupes is essentially an extremely unique & extremely beneficial new search query tool. Specifically, engineered using a highly innovative algorithm, which, provides the consumer with massive price comparisons, ultimately creating major consumer savings.

This new algorithm/website is engineered to provide essential information about the piece of jewelry, which will include the current value/worth, certification, specifications, history, availability, credibility, and the precise location for the desired piece. Jewelry Network Jupe LLC's main goal is to save the consumer Money by comparing apples to apples.

Our purpose is to convey specific, helpful information to a specific user/audience, so that the novice customer will be able to navigate Jupes site, extremely easily, ultimately providing the customer with a sense of trust. This highly sophisticated algorithm/website/network will be responsible for massive market growth in an already billion dollar a year market.

The very first thing the algorithm searches for is certification. Is the piece of jewelry certified. Certification papers act like a birth certificate. We highly encourage that the piece of jewelry comes with certification papers from a reputable qualifying laboratory/Institution when making a purchase. Proper certification increases the value, and helps insurance companies expedite their policies quicker. Jewelers Mutual is a terrific insurance company, and our website will have a direct link setup with them. Our network recommends the consumer obtains jewelry article insurance. The Gemological Institute of America (GIA), is a very reputable certification Institute. (GIA), being one of the most prestigious certification Institutions in the world uses the rapaport to determine the worth/value. (AGS), The American Gem Society, also prestigious in certification uses the same method to calculate worth/value. Our algorithm uses almost a dozen different Gemological Institutions Globally when searching for certification. The algorithm is engineered to search for the most prestigious certification Institutions first. Some of the world's largest jewelry chains have their own in house laboratories. (bias). That's a whole different subject, however, those are built into the algorithm, also. The second thing is, was the diamond ethically sourced, (Conflict Free). We are huge supporters of Human Rights Groups, sustainability, and we're working on having every diamond know its birthplace. Proper certification papers will eventually have the Providences birthplace printed on the documents, which, we're extremely excited about. The third thing is, the credibility of the seller/purchaser. E.g return policy, warranty, repair, broken engagement, cleanings, quality is huge, tax incentives, & layaways. Our network/algorithm is an (msp), engineered for both purchasing or selling, and auction houses globally will be able to use it. The fourth thing is, price versus value.

How much of a percentage the consumer is purchasing or selling it for. You might be wondering how the algorithm calculates the value. The algorithm's methodology incorporates the official Rapaport. This rapaport dictates current market prices. Supply and demand. The official rapaport is an extremely important ingredient that the algorithm feeds off of. It sets the current market price for over 20 thousand wholesalers and manufactures globally. Our highly sophisticated algorithm automatically adjusts with updated rapaports. The report is updated every two weeks on Thursday at 11:59pm EST.

In conclusion, this new highly sophisticated algorithm/website/network is developed for saving the consumer time and money with precise price comparison information, and location. And, will be solely responsible for massive market growth. We believe this network will eventually have hundreds of millions of daily unique visitors. It's being engineered, designed, and developed by some of the world's top accredited programmers. This network will be incredibly beneficial for economic growth, sustainability, consumer stability, and massive consumer savings. It's engineered with the utmost computational complexity, but extremely rewardly effective, and very simple to use. (Jewelry Unique Purchasing Engine). Jewelry Network Jupe LLC will provide the consumer with exceptional guidance and direction, creating massive consumer savings. Our algorithm/website/network is being engineered for exponential expansion and growth in a specific market. (Jewelry)

Jewelry Network Jupe LLC's daily specifications.

Maintain, manage, and update the algorithm/website daily. Maintain data, quickly, and accurately from various sources. Preserve the efficiency, and validity of the algorithm/ methodology routinely. Provide daily updates of customer experience, and maintain algorithm identification. Execute decorative features enabling expert authority with precise computational craftsmanship, and comprehensive authoritative information with accurate provided workmanship to exceed the utmost customers satisfaction expectations. Routinely provide exceptional consumer online services. Consistently, and accurately input the necessary data the algorithm needs to run effectively by inputting current updated market Precious Metals & Diamond prices. (Kitco) - (Rapaport) Consistently, check current market growth and consumer sales. Update current Jewelry Manufacturing trends daily. Analyze stock market growth in the market of jewelry stores and sales. Maintain long lasting relationships with future advertisers. Make sure the algorithm is functioning properly and accurately daily. Consistently make changes as needed in order for our network to operate extremely efficient and better than any of our competitors. Always stay one step ahead of any of our competitors by paying attention to detail and design development, routinely.
